PROFESSIONAL PROFILE

Civil engineering graduate with experience in site supervision, civil structures, technical coordination, and quality control. Application for admission to the Ordre des ingenieurs du Quebec submitted on March 16, 2026 and currently under review in order to officially obtain CPI status. Strong proficiency in AutoCAD, SolidWorks, and technical design tools. Recognized for rigor, autonomy, and the ability to manage priorities in demanding site and manufacturing environments.

PROFESSIONAL EXPERIENCE

Engineering Technical Coordinator

De La Fontaine, Sherbrooke, Quebec

January 2024 - Present

- Supervise and optimize 3D design, manufacturing, and technical order-processing activities for specialized metal doors and frames.
- Coordinate engineering, design, and production teams across Canada, Tunisia, and Mexico to ensure compliance with schedules and quality standards.
- Support continuous improvement initiatives for technical and manufacturing processes.
- Ensure product compliance with technical requirements and client specifications.
- Collaborate with cross-functional stakeholders to resolve technical and operational issues.

3D Designer

De La Fontaine, Sherbrooke, Quebec

July 2023 - January 2024

- Designed custom 3D models of metal doors and frames using SolidWorks.
- Produced detailed technical drawings for manufacturing.
- Verified design compliance with production and quality requirements.

Welder - Metal Doors and Frames Manufacturing

De La Fontaine, Sherbrooke, Quebec

December 2022 - July 2023

- Performed MIG, spot, and projection welding operations.
- Participated in the fabrication and assembly of industrial metal components.
- Maintained quality and safety standards in a manufacturing environment.

Inspector - Reinforced Concrete Structures

AusculTECH Inc., Sherbrooke, Quebec

January 2022 - April 2023

- Conducted visual and technical inspections of reinforced concrete structures.
- Performed non-destructive testing including radar, corrosion, and resistivity measurements.
- Prepared technical reports and contributed to structural integrity assessments.
- Ensured compliance with technical standards and safety requirements.

Laboratory Testing Lead

Artelia, Sherbrooke, Quebec

June 2021 - August 2021

-
- Performed testing on construction materials, including compression, gradation, and absorption.
 - Analyzed results and verified material compliance with applicable standards.
 - Collaborated with technical teams on civil engineering projects.

PROFESSIONAL EXPERIENCE (continued)

Final-Year Project

Societe Chaabane et Cie, Tunis, Tunisia

February 2018 - June 2018

- Provided technical follow-up for the construction of a road interchange connecting GP10 to Voie X.
- Participated in the inspection of civil structures, including piles, footings, piers, and cap beams.
- Performed material quality control using laboratory and in-situ testing.
- Completed pavement structure design based on geotechnical results and traffic data.

Advanced Internship

Societe Chaabane et Cie, Medenine, Tunisia

January 2017 - February 2017

- Contributed to the technical follow-up of earthworks and civil structures on a road construction site.
- Observed execution methods for road infrastructure and civil works.
- Participated in material quality control and work monitoring in accordance with technical standards.
- Supported progress tracking and implementation of health and safety measures.

Introductory Internship

Adam Consulte, Sfax, Tunisia

January 2016 - February 2016

- Participated in the follow-up of the construction of a reinforced concrete residential building.
- Observed and assisted with formwork, rebar placement, concreting, and stripping operations.
- Observed the use of construction equipment and materials such as cranes, concrete mixers, props, vibrators, and reinforcement.
- Participated in work follow-up for hollow-core floor systems, including block installation and reinforcement of beams and ribs.

EDUCATION

Master of Applied Science in Civil Engineering

Universite de Sherbrooke, Sherbrooke, Quebec

August 2021 - March 2024

Graduate Diploma in Civil Engineering

Universite de Sherbrooke, Sherbrooke, Quebec

August 2020 - August 2021

Bachelor's Degree in Civil Engineering

Institut International de Technologie, Sfax, Tunisia

September 2018 - December 2021

Applied Degree in Civil Engineering

Institut Supérieur des Etudes Technologiques, Sfax, Tunisia

September 2015 - June 2018

SKILLS

CAD and Modeling Software: AutoCAD, SolidWorks, Tekla Structures, Robot Structural Analysis, MS Project, Microsoft Office, Microsoft Dynamics AX

Civil Engineering Competencies: Blueprint and specification review, technical coordination and site supervision, quality control and inspection, road geotechnics, civil structures, site health and safety, priority management, work planning

Languages: French: Highly proficient spoken and written | English: Working proficiency | Arabic: Native speaker
